

Table of Contents

	Unit	Topic	Page
Chapter 1.	Quadratic Functions		10
	1.1	Factor a Trinomial by Grouping	10
	1.2	Solve Quadratics with $a \neq 1$	13
	1.3	Graphs of Quadratic Functions	20
	1.4	Vertex Form and Transformations	25
Chapter 2.	Imaginary Numbers		31
	2.1	Set of Complex Numbers	31
	2.2	Operations with Complex Numbers	37
	2.3	Imaginary Roots	41
Chapter 3.	Circles		52
	3.1	Equations of Circles	52
	3.2	Circle-Linear Systems	57
Chapter 4.	Polynomial Functions		62
	4.1	Operations with Functions	62
	4.2	Long Division	67
	4.3	Synthetic Division	73
	4.4	Remainder Theorem	78
	4.5	Factor Polynomials	82
	4.6	Find Roots by Factoring	91
	4.7	Root Theorems	97
	4.8	Properties of Polynomial Graphs	104
	4.9	Graph Polynomial Functions	122
	4.10	Polynomial Transformations	133
	4.11	Systems of Polynomial Functions	139
Chapter 5.	Radicals and Rational Exponents		145
	5.1	Rationalize Binomial Denominators	145
	5.2	n th Roots	149
	5.3	Operations with n th Roots	154
	5.4	Solve Equations with Radicals	158
	5.5	Graphs of Radical Functions	166
	5.6	Negative Exponents	172
	5.7	Rational Exponents	176
	5.8	Power Regression	184

Chapter 6.	Rational Functions	187
	6.1 Undefined Expressions	187
	6.2 Simplify Rational Expressions	189
	6.3 Multiply and Divide Rational Expressions	195
	6.4 Add and Subtract Rational Expressions	200
	6.5 Simplify Complex Fractions	208
	6.6 Solve Rational Equations	210
	6.7 Model Rational Expressions and Equations	220
	6.8 Graphs of Rational Functions	229
Chapter 7.	Exponential Functions	238
	7.1 Solve Simple Exponential Equations	238
	7.2 Rewrite Exponential Expressions	242
	7.3 Graphs of Exponential Functions	245
	7.4 Exponential Regression	254
	7.5 Exponential Growth or Decay	259
	7.6 Rate Conversion	266
	7.7 Continuous Growth or Decay	270
Chapter 8.	Logarithms.....	275
	8.1 General and Common Logarithms	275
	8.2 Graphs of Log Functions	281
	8.3 Properties of Logarithms	292
	8.4 Use Logarithms to Solve Equations	296
	8.5 Natural Logarithms	304
Chapter 9.	Financial Applications	312
	9.1 Periodic Compound Interest	312
	9.2 Continuous Compound Interest	318
	9.3 Regular Contributions	324
	9.4 Evaluate Loan Formulas	329
Chapter 10.	Trigonometric Functions	335
	10.1 Trigonometric Ratios	335
	10.2 Radians	340
	10.3 Unit Circle	346
	10.4 Pythagorean Identity	361
	10.5 Solve Simple Trigonometric Equations	365
	10.6 Circles of Any Radius	371
	10.7 Graphs of Parent Trig Functions	379
	10.8 Trigonometric Transformations	388
	10.9 Graph Trigonometric Functions	402
	10.10 Model Trigonometric Functions	409

Chapter 11. Properties of Functions	419
11.1 Compare Functions	419
11.2 Even and Odd Functions	424
11.3 Inverse Functions	429
11.4 Average Rate of Change	439
11.5 Solutions to Equation of Two Functions	447
11.6 Solutions to Inequality of Two Functions	457
Chapter 12. Sequences and Series	461
12.1 Arithmetic Sequences	461
12.2 Geometric Sequences	469
12.3 Recursively Defined Sequences	478
12.4 Sigma Notation	486
12.5 Arithmetic Series	491
12.6 Geometric Series	497
Chapter 13. Probability	504
13.1 Set Theory	504
13.2 Basic Probability	508
13.3 Probability Involving And or Or	516
13.4 Two-Way Frequency Tables	523
Chapter 14. Statistics.....	534
14.1 Data Collection	534
14.2 Bias	540
14.3 Normal Distribution	545
14.4 Areas Under Normal Curves	554
14.5 Plausible Outcomes	561
14.6 Estimate Population Parameters	572
Appendix I. Reference Sheet.....	582
Appendix II. Index	583
